The below guidelines are taken from: https://www.acm.org/publications/gi-proceedings

Camera-Ready Paper Submission is due by June 22, 2020.

All accepted papers require the explicit submission of a camera-ready version, even if you do not intend to make any changes to your original submission. To complete this process, **please read carefully and follow the instructions below**:

Copyright related info

ACM has an automated rights management form collection system for ACM published proceedings. The contact (lead) author(s) will be sent the ACM rights management form and complete instructions on how to complete their form. A weekly reminder will be sent to all contact author(s) whose forms still need to be completed. Reminder notices will be emailed every week until four weeks before the conference/workshop.

After completing the rights management form, authors will be emailed the correct rights text and bibliographic strip to place within their paper. Authors must enter the text into their paper.

As rights management emails are sent from an automated system, there is a chance that emails sent will wind up in SPAM folders. Please make sure that you set email SPAM settings to allow emails from "rightsreview@acm.org"

Template for camera-ready PDF

Please use "sigconf" proceedings template from this page: ACM template

ACM support for preparing camera-ready PDF

- ACM offers 24/7 author support for these templates through our vendor, Aptara. For any problems and inquires related to TeX/MS-Word template, please email acmtexsupport@aptaracorp.com.

- *ACM* has partnered with Overleaf, a free cloud-based, collaborative authoring tool, to provide an *ACM* LaTeX authoring template. The ACM LaTeX template on Overleaf platform is available to all ACM authors here.

- LANGUAGE SERVICES: ACM has partnered with International Science Editing (ISE) to provide language editing services to ACM authors. ISE offers a comprehensive range of services for authors including standard and premium English language editing, as well as illustration and translation services, and also has significant outreach in China. Editing is available for both Word and LaTeX files. As an ACM author, you will receive a generous discount on ISE editing services.

  To take advantage of this partnership, visit http://acm.internationalscienceediting.com/. (Editing services are at author expense and do not guarantee publication of a manuscript.)

Language Requirements

In the case of ISLPED, the complete manuscript needs to be submitted in English; author(s) (including affiliations) submitted using the Roman Alphabet as opposed to Cyrillic, Chinese, or Arabic.

ACM Computing Classification categories

The authors should apply ACM Computing Classification categories and terms. The templates provide space for this indexing. The Computing Classification Scheme can be found at: https://dl.acm.org/ccs/ccs.cfm

If there are troubles finding appropriate categories and subject descriptors, contact Craig Rodkin rodkin@hq.acm.org for suggestions.

Supplements and/or Auxiliary Material

ACM calls extra files to be reviewed with the submitted paper "Supplements." An example might be a proof that is too long to be included within the allotted number of pages but which is supplied as an online-only Appendix. Supplements are an integral part of the paper and are published with it as such. Rights management of the paper applies as well to these integral Supplements. Checking Part I of the form transfers rights management on the paper and its Supplements.

ACM calls extra files that are not reviewed as part of the submitted paper but which an author supplies as an additional resource for the reader "Auxiliary Materials." An example might be an extensive data set used in the research for the paper, or programs that were run on that data to derive the results. ACM will not take copyright to Auxiliary Material, which is not reviewed and is not part of the formally published work. But ACM still needs permission from the owner to serve Auxiliary Materials and an agreement that the author is abiding by ACM terms when supplying the non-reviewed Auxiliary Material. Checking Part II of the form and saying YES to the terms grants ACM permission to serve the Auxiliary Materials.

If an author is supplying both kinds of files, Supplements, and Auxiliary Materials, they should be provided in separate zips and labeled as such - aux.zip or suppl.zip. A short readme file the author provides will appear in the DL along with each Supplement and/or Auxiliary Material describing the content and whatever requirements there are for using it.

What needs to be submitted

Alongside the camera-ready PDF's, **authors** are required to collect and submit the **source files for each paper – all files which were used to create the final output (PDF), be they Word, LaTeX, image files, etc.** If there are Supplements and Auxiliary Materials, they should be provided in separate zips and labeled as such - aux.zip or suppl.zip. More details on Supplements and Auxiliary Materials are provided in a section below.

Submission of source files was always a requirement, albeit one that was hardly enforced in the past. In anticipation of serving both accessibility compliant PDF and responsive HTML5 formatted files from the ACM Digital Library, ACM is now enforcing this requirement.

Submit your final paper PDF (and the source code as ZIP file) through the SOFTCONF system (https://www.softconf.com/j/islped2020/). Please check that the copyright notice in your PDF (only first page) matches the copyright specified in the copyright form (based on author affiliations).

Register for the conference

Note that each paper requires one full registration at the conference in order to be published. You must register before June 22nd, 2020 (at the early registration rate). The registration form can be accessed on-line at the ISLPED website: http://www.islped.org/2020/registration.php .

Presentation of your paper

The presentation of the accepted papers/posters using the virtual conference format for ISLPED 2020 is mandatory. Papers that are not presented will be excluded from publication.
